The *Energy Systems Technical Committee (ESTC)* of the ASME Dynamic Systems and Control Division, and the *IEEE Technical Committee on Automotive Controls (TCAC)* and *IEEE Technical Committee on Smart Grids (TC-SG)* of the IEEE Control Systems Society invite technical contributions for **invited sessions** in the field of *Energy Storage and Conversion Systems* at the 2019 ACC. Contributions are solicited in the aforementioned area with emphasis on modeling, estimation, control, diagnostics and optimization. We look for contributions that will lead to cohesive sessions highlighting emerging areas of research in energy storage and conversion systems, including (but not limited to) batteries, fuel cells, supercapacitors, flywheels, thermal storage, etc. The guidelines for authors can be found at <http://acc2019.a2c2.org/author-information/>

Please send your submission by email with title “**ACC19 ESTC-TCAC-TCSG Invited Session – Energy Storage Systems**” to Satadru Dey (satadru.dey@ucdenver.edu), Scott Moura (smoura@berkeley.edu), Xinfan Lin (lxflin@ucdavis.edu), Dyche Anderson (Rander34@ford.com), Yasha Parvini (parvini@udmercy.edu), Hector Perez (hепerez@berkeley.edu), Youngki Kim (youngki@umich.edu).
